## JSP Tags

**JSP Custom Tags** 

JSP Standard Tag Library (JSTL)

#### Problem

• Email from: The Boss

We want to include a weather report in our JSP pages.

## Option 1: Use Scriptlets

```
<%
 // connect to remote weather service
 // submit our weather request
 // receive weather results
 // parse the data: xml or json???
 // display output in JSP page
%>
```

#### **Bad Practice**

- Mix business code with presentation code
- Not reusable

## Option 2: JSP Custom Tags

- Move heavy business logic into supporting class
- Insert JSP custom tag to use supporting class

Supporting Java Class

## Benefits of JSP Custom Tags

Minimize the amount of scriptlet code in a JSP

Avoids dumping thousands of lines of code in a JSP

• JSP page is simple ... main focus of JSP is only the presentation

Tag is reusable

## JSP Standard Tag Library (JSTL)

Oracle created a Specification for standard tags
